

Nerdfighters Community and Youtube Channels

Website: <http://nerdfighteria.com/>,
<http://youtube.com/crashcourse>,
<http://youtube.com/scishow>

Description:

This link offers an overview of all of the projects and youtube channels created by Hank and John. The Tumblr, Forum and Twitter link for each specific project is posted at the top and provide opportunities for communication and participation with each channel.

The community of producers greatly expands as you factor in the other youtube contributors who collaborate with the Nerfingteria community.

How to Use the Resource

- We suggest using Crash Course as a gateway drug.
 - Begin by using part of a Crash Course video to supplement one of your lessons.
 - Subscribe on Youtube to the SciShow or vlogbrothers channels to be aware of their current contributions
 - Directly use videos on interesting current events or draw from the topics they speak on where useful.
 - CrashCourse is searchable for Biology and Chemistry topics

Why This Resource is Useful

1. **Amazing and engaging production value:** The brothers and their collaborators consistently produce videos that present educational information in a manner that is professionally polished and addictively entertaining.
2. **Engaging and Broad :** Youtube begins linking you to other crashcourse, scishow, numberphile, sixty symbols, C G P Grey, Veritasium and Vsauce videos that present on everything from theoretical math, chemistry, cool experiments, current events and even english literature. Further, the videos are positively addicting so hours may be spent learning on youtube rather than being a 'little monster'
3. **Enveloping Community:** If you have subscribed to receive alerts for vlogbrothers channel on youtube, their regular (approx every 3 or 4 days) 4 min videos introduce other projects that are currently running. These projects encourage involvement in the community and philanthropic exploits.
4. **Useful Structure:** Crashcourse Chemistry and Biology have well thought out and highly useful trackable structure. Each video has a table of contents that allows you to track to that part of the video. There are also introductory hooks and conclusive summaries for each section.
